

NORWICH City Council

Committee name: Audit

Committee date: 23/01/2023

Report title: **Statement of Accounting Policies & State of External Audit**

Portfolio: Councillor Kendrick, Cabinet member for resources

Report from: Interim Chief Finance Officer (S151 officer)

Wards: All wards

OPEN PUBLIC ITEM

Purpose

To provide members with the opportunity to comment on the draft Accounting Policies and to update members on the state of the audit environment.

Recommendation:

It is recommended that the Audit Committee review the Accounting Policies and make any comments or recommendations as they see fit.

Policy framework

The council has five corporate priorities, which are:

- People live independently and well in a diverse and safe city.
- Norwich is a sustainable and healthy city.
- Norwich has the infrastructure and housing it needs to be a successful city.
- The city has an inclusive economy in which residents have equal opportunity to flourish.
- Norwich City Council is in good shape to serve the city.

This report meets the Norwich City Council is in good shape to serve the city priority.

Report Details

1. The Audit Committee is responsible for signing off the Accounts and as such are required to review the Accounts in significant detail. A major aspect is the Accounting policies. These need to be reviewed to determine as to whether they are prudent or not and reflect the accounting requirements of the Council.
2. The Council does not propose changing the accounting policies at this stage beyond the change in the MRP which will go to full Council. This is in part because with already existing delays to the Audit, there were concerns that with more to Audit, the Council might experience further ones. Also, there are no substantive obvious reasons as to why the Accounting policies might need to be changed.
3. Moreover, the Council has always taken a prudent approach of keeping as close to the Code of Local Government Practice as it can and therefore rarely needs to have any accounting policies that to any degree or differentiate from the industry standard.
4. The council is intent on repeating the process of delivering the Draft Accounts by the statutory deadline of May 31st, despite all the challenges. It will continue with the approach of reviewing the Accounts in detail if it has time before the Audit. It wants to retain the high quality upon which Norwich has built its reputation.
5. The Council has responded to all audit queries relating to 2021/22 and 2022/23 with which it has been provided by Ernst & Young (EY). The items primarily relate to the Value for Money elements as the Government is keen that the resilience of authorities is the priority. Nonetheless, there is a lull in Government making a decision as to whether audit firms should continue with existing audits or do the bare minimum on audits prior to 2023/24 to ensure that the authorities are viable. The plan for a statutory disclaimer for all accounts with audits not complete has still not been put forward formally as the agreed position.
6. EY is intent, subject to Government changing its current thinking, of conducting an interim Audit for the 2023/24 accounts prior to the end of the financial year. This is due to their desire to get the timetable back on the historic pattern before the current backlog arose.

Consultation

7. The purpose of the report is informing and consulting members of the Audit Committee. No further consultation is necessary.

Implications

Financial and Resources

8. There are no specific financial implications from this report.

Legal

9. There are no specific legal implications arising from this report.

Statutory Considerations

Consideration:	Details of any implications and proposed measures to address:
Equality and Diversity	Not applicable for this report.
Health, Social and Economic Impact	Not applicable for this report.
Crime and Disorder	Not applicable for this report.
Children and Adults Safeguarding	Not applicable for this report.
Environmental Impact	Not applicable for this report.

Risk Management

Risk	Consequence	Controls Required
Failure to not review audit policies before inclusion in the Accounts might lead to a poorer set of Accounts.	The Council would not be perceived as having good governance externally.	The Council sends the draft Accounting policies to Committee Annually for review.

Other Options Considered

Not applicable for this report.

Reasons for the decision/recommendation

The committee is duty bound to discharge its duties.

Background papers:

None

---	---

1. Accounting Policies

Going Concern

The concept of a going concern assumes that an authority, its functions and services will continue in operational existence for the foreseeable future. Where this is not the case, particular care will be needed in the valuation of assets, as inventories and property, plant and equipment may not be realisable at their book values and provisions may be needed for closure costs or redundancies. An inability to apply the going concern concept can have a fundamental impact on the financial statements.

Accounts drawn up under the Code assume that a local authority's services will continue to operate for the foreseeable future. This assumption is made because local authorities carry out functions essential to the local community and are themselves revenue-raising bodies (with limits on their revenue-raising powers arising only at the discretion of Central Government). If an authority was in financial difficulty, the prospects are thus that alternative arrangements might be made by Central Government either for the continuation of the services it provides or for assistance with the recovery of a deficit over more than one financial year.

General Principles

The Statement of Accounts summarises the Council's transactions for the 2022/23 financial year and its position at 31 March 2023. The Council is required to prepare an annual Statement of Accounts by the Accounts and Audit Regulations 2015. These regulations require the Statement of Accounts to be prepared in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2022/23, supported by International Financial Reporting Standards (IFRS) and statutory guidance issued under section 12 of the 2003 Act.

The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

The Statement of Accounts has been prepared on a 'going concern' basis.

Accruals of Income & Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from the sale of goods is recognised in accordance with the terms and conditions of the contract.
- Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Rental income from the Council's housing stock is accounted for on the basis of a full year, i.e. 365 or 366 days as appropriate.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet; the de Minimis for accruals is £5,000. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

- The Council recognises revenue from contracts with service recipients when it satisfies a performance obligation by transferring goods or services to a recipient, measured as the amount of the overall transaction price allocated to that obligation.

Cash & Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature within three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Council's cash management.

Prior Period Adjustments, Changes in Accounting Policies & Estimates & Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e., in the current and future years affected by the change and do not give rise to a prior period adjustment.

Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Council's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied.

Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

The council prepared the cash flow statement using the indirect method in 2022/23. There are no changes to accounting policies in 2022/23.

Charges to Revenue for Non-Current Assets

Services and trading accounts are debited with the following amounts to record the cost of holding non-current assets during the year:

- depreciation attributable to the assets used by the relevant service.
- revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off.
- revaluation and impairment gains, where they reverse losses previously charged to services
- amortisation of intangible non-current assets attributable to the service.

The Council is not required to raise Council tax to fund depreciation, revaluation and impairment losses or amortisations. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement, this provision known as the Minimum Revenue Provision (MRP), is equal to an amount calculated on a prudent basis determined by the Council in accordance with statutory guidance (England and Wales). Depreciation, revaluation and impairment losses and amortisations are therefore replaced by the contribution in the General Fund Balance (Minimum Revenue Provision), by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two. No MRP is currently charged on HRA debt, as the debt acquired in relation to the HRA, as it is outside the scope of this regime.

Employee Benefits

Benefits Payable during Employment

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Council. An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that these benefits are charged to the General Fund in the financial year in which payment is made.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy and are charged on an accruals basis to the relevant service cost line in the CIES when the Council is demonstrably committed to the termination of the employment of an officer or group of officers or making an offer to encourage voluntary redundancy. Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund balance to be charged with the amount payable by the Council to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

Post-Employment Benefits

The majority of the Council's employees are members of the Local Government Pensions Scheme, administered by Norfolk County Council. The Scheme provides defined benefits to members (retirement lump sums and pensions), earned as employees worked for the Council. The Local Government Scheme is accounted for as a defined benefits scheme:

- The liabilities of the Norfolk pension fund attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method - i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc. and projections of projected earnings for current employees.
- Liabilities are discounted to their value at current prices, using a discount rate based on the indicative rate of return on high quality corporate bond chosen by the Fund's Actuary.
- The assets of the Norfolk pension fund attributable to the Council are included in the Balance Sheet at their fair value:
 - quoted securities - current bid price
 - unquoted securities - professional estimate
 - unitised securities - current bid price
 - property - market value
- The change in the net pensions liability is analysed into the following components:
 - current service cost - the increase in liabilities as a result of years of service earned this year - allocated in the CI&ES to the services for which the employees worked
 - past service cost - the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years - debited to the Surplus or Deficit on the Provision of Services in the CI&ES as part of the cost of other Operating Expenses

- net interest on the defined benefit liability, i.e. net interest expense for the Council – the change during the period in the net defined benefit liability that arises from the passage of time charged to the financing and investment income line of the Comprehensive Income and Expenditure Statement – this is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the defined benefit liability at the beginning of the period – taking account of any changes in the net defined benefit liability during the period as a result of contribution and benefit payments.
- remeasurements comprising:
 - the return on plan assets, excluding amounts included in net interest on the net defined liability, charged to the Pension Reserve as Other Comprehensive Income and Expenditure
 - actuarial gains or losses - changes in the net pension's liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions - charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
- contributions paid to the Norfolk pension fund - cash paid as employer's contributions to the pension fund in settlement of liabilities; not accounted for as an expense.

In relation to retirement benefits, statutory provisions require the General Fund and Housing Revenue Account to be charged with the amount payable by the Council to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are appropriations to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund and Housing Revenue account of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary Benefits

The Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

Events after the Balance Sheet Date

Events after the balance sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events
- those that are indicative of conditions that arose after the reporting period – the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

Financial Instruments

Financial instruments are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument. Non-exchange transactions, such as those relating to taxes, benefits, and government grants, do not give rise to financial instruments.

They are classified based on the business model for holding the instruments and their expected cashflow characteristics.

Financial Liabilities

Financial liabilities are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and initially measured at fair value and carried at their amortised cost. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments over the life of the instrument to the amount at which it was originally recognised.

This means that the amount presented in the Balance Sheet is the outstanding principal repayable (plus accrued interest) and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year according to the loan agreement.

Liabilities include trade payables. It has been assessed that the carrying amount in the Balance Sheet is a proxy for the fair value of those liabilities.

Financial Assets

There are three main classes of financial assets measured at:

- Amortised cost. These represent loans and loan-type arrangements where repayments or interest and principal take place on set dates and at specified amounts. The amount presented in the Balance Sheet represents the outstanding principal received plus accrued interest. Interest credited to the CIES is the amount receivable as per the loan agreement.
- Fair Value Through Other Comprehensive Income (FVOCI) – These assets are measured and carried at fair value. All gains and losses due to changes in fair value (both realised and unrealised) are accounted for through a reserve account, with the balance debited or credited to the CIES when the asset is disposed of.
- Fair Value Through Profit and Loss (FVTPL). These assets are measured and carried at fair value. All gains and losses due to changes in fair value (both realised and unrealised) are recognised in the CIES as they occur.

The authority's business model is to hold investments to collect contractual cash flows. Financial assets are therefore classified as amortised cost, except for those whose contractual payments are not solely payment of principal and interest (i.e. where the cash flows do not take the form of a basic debt instrument).

Expected Credit Loss Model

The authority recognises expected credit losses on all of its financial assets held at amortised cost or where relevant FVOCI, either on a 12-month or lifetime basis. The expected credit loss model also applies to lease receivables and contract assets. Only lifetime losses are recognised for trade receivables (debtors) held by the authority.

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses. Where risk has increased significantly since an instrument was initially recognised, losses are assessed on a lifetime basis. Where risk has not increased significantly or remains low, losses are assessed on the basis of 12-month expected losses.

The authority has a portfolio of a significant number of Decent Homes Loans and Home Improvement Loans to local residents. It does not have reasonable and supportable information that is available without undue cost or effort to support the measurement of lifetime expected losses on an individual instrument basis. It has therefore assessed losses for the portfolio on a collective basis.

Financial Assets Measured at Fair Value through Other Comprehensive Income

At initial recognition, an authority may make an irrevocable election to present in Other Comprehensive Income and Expenditure subsequent changes in the fair value of an investment in an equity instrument within the scope of IFRS 9 that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies. These equity instruments shall be described as being designated to fair value through other comprehensive income.

Movements in amortised cost are debited/credited to the Surplus or Deficit on the Provision of Services, but movements in fair value debited/credited to Other Comprehensive Income and Expenditure. Cumulative gains/losses on fair value are transferred to the General Fund Balance on de-recognition.

Exceptional Items

When items of income and expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expense Statement or in the notes to the account.

Government Grants & Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Council when there is reasonable assurance that:

- the Council will comply with the conditions attached to the payments, and
- the grants or contributions will be received.

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied. Conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor.

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (non-ring-fenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied reserve. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied reserve are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

Community Infrastructure Levy

The Authority has elected to charge a Community Infrastructure Levy (CIL). The levy will be charged on new builds (chargeable developments for the Authority) with appropriate planning consent. The Council charges for and collects the levy, which is a planning charge. The income from the levy will be used to fund a number of infrastructure projects (these include transport, flood defences and schools) to support the development of the area.

Part of the CIL income is retained to offset the cost of administration and is accounted for as income in the Comprehensive Income and Expenditure Statement. The rest is intended for use to finance capital and is treated as capital contributions. As it is received without conditions it is recognised

immediately as capital grants and contributions income and is then transferred to the Capital Grants Unapplied Reserve. A small proportion of the monies may be used to fund revenue expenditure.

The income from CIL is accounted for on an accruals basis and recognised immediately in the CI&ES at the commencement date of the chargeable development. Surcharges and interest received in accordance with the CIL regulations will be accounted for as if they were CIL receipts.

Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value. As a non-financial asset, investment properties are measured at highest and best use.

Properties are not depreciated but are revalued on a five year rolling programme according to market conditions with the exception of properties with a brought forward value in excess of £500,000 as these are valued every year. Based on consultation with the valuer, any other assets which may have significant volatility in fair value are also included in the assessment. Carrying values are reviewed annually to ascertain if materially different from market values for those assets not valued in year.

Revaluation gains and losses are recognised in the Financing and Investment Income and Expenditure line within the Comprehensive Income and Expenditure Statement. However, regulations do not permit unrealised gains and losses to impact the General Fund balance. Therefore, gains and losses are reversed via the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any sale proceeds greater than £10,000) the Capital Receipts Reserve

Rental income is recognised in the Financing and Investment Income and Expenditure line within the Comprehensive Income and Expenditure Statement on a straight-line basis.

Intangible Assets

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Council as a result of past events (e.g. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council.

Internally generated assets are capitalised where it is demonstrable that the project is technically feasible and is intended to be completed (with adequate resources being available) and that authority will be able to generate future economic benefits or deliver service potential by being able to use the asset. Costs relating to the development of computer software for internal use are capitalised where it can be measured reliably as attributable to the asset and is restricted to that incurred in the development phase. When the software is available for its intended use, these costs are amortised in equal annual amounts over the estimated useful life of the software.

Amounts capitalised include the total cost of any external products or services and labour costs directly attributable to development. Management judgement is involved in determining the appropriate internal costs to capitalise and the amounts involved. The useful life is determined by management at the time the software is acquired and brought into use and is regularly reviewed for appropriateness. For computer software licences, the useful life represents management's view of the expected period over which the Council will receive benefits from the software.

Intangible assets are measured initially at cost. The depreciable amount of an intangible asset is written down over its useful life, to the appropriate line in the Comprehensive Income and Expenditure Statement. No intangible assets are recorded with indefinite lives. An asset is tested for impairment whenever there is an indication that the asset might be impaired, and any losses are posted to the appropriate line in the Income and Expenditure Statement.

The calculated amounts for amortisation and impairment are charged to the Cost of Services in the Comprehensive Income and Expenditure Account, but they are not proper charges against the General Fund. A transfer is therefore made from the Capital Adjustment Account to the General Fund to reverse the impact.

Interest in Companies and Other Entities

Local authorities are required to consider all their interests and to prepare a full set of group financial statements where they have material interests in subsidiaries, associates or joint ventures. In order to assess whether the Council has interests relevant to group accounts, consideration has been given to involvement with companies, partnerships, voluntary organisations, and other public bodies to determine whether:

- the Council has a formal interest in a body which gives it access to economic benefits or service potential and that the body is an identifiable entity carrying on a trade or business of its own.
- the interest constitutes control over the majority of equity capital or voting rights or over rights to appoint the majority of the governing body or the interest involves it exercising, or having the right to exercise, dominant influence over the entity, such that the entity is classified as a subsidiary of the Council.
- If the authority does not have control, whether its interest involves it being able to exercise a significant influence over the entity without support from other participants, such that the entity is classified as an associate of the authority.
- If the authority does not have control, whether its interest allows it to direct the operating and financial policies in conjunction and with the consent of the other participants in the entity, such that the entity is classified as a joint venture for the authority.

Consideration has been given to the relationship with all potential entities and the following disclosures have been made:

Interests in other entities as shown in a note to the Core Financial Statements

The relationship with the body disclosed is not material and therefore there is no entity where the Council's interest is such that it would give rise to the requirement to prepare group accounts.

The position is reviewed and updated on an annual basis.

The Council has gone through a process in line with the Code guidance flowcharts and concluded Group Accounts are required in 2022/23. Further detail on the Group boundary judgement is included in the relevant notes and the Group Financial statements.

Leases

The Council as Lessee

Finance Leases

Leases are classified as finance leases where the terms of the agreement transfer substantially all the risks and rewards of ownership of the leased asset. Key factors considered include the length of the lease term in relation to the economic life of the asset, present value of the minimum lease payments in relation to the asset's fair value and whether the Council obtains ownership of the asset at the end of the lease term.

For leases of land and buildings, the land and building elements are considered separately for classification.

Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the Council are added to the carrying amount of the asset. Premiums paid on entry into a lease are applied to writing down the lease liability. Contingent rents are charged as expenses in the periods in which they are incurred.

Property, Plant and Equipment recognised under finance leases is accounted for using the policies applied generally to such assets, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life (where ownership of the asset does not transfer to the Council at the end of the lease period).

The interest element of finance leases is charged to Financing and Investment Income and Expenditure within the Comprehensive Income and Expenditure Statement. The amount of the finance lease payment to write down the liability is included within the Minimum Revenue Provision in line with statutory guidance.

Operating Leases

All other leases are treated as operating leases.

Rentals paid under operating leases are charged to the Comprehensive Income and Expenditure Statement as an expense of the services benefiting from use of the leased property, plant or equipment. Charges are made on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g., there is a rent-free period at the commencement of the lease).

The Council as Lessor

Finance Leases

Where the Council grants a finance lease over a property or an item of plant or equipment, the relevant asset is written out of the Balance Sheet as a disposal and replaced by a long-term debtor in the Balance Sheet valued on the future income due under the finance lease.

Operating Leases

Where the Council grants an operating lease over a property or an item of plant or equipment, the asset is retained in the Balance Sheet. Rental income is recognised in the Comprehensive Income and Expenditure Statement on a straight-line basis over the life of the lease, even if this does not match the pattern of payments (e.g. there is a premium paid at the commencement of the lease).

Overheads & Support Services

The Code of Practice on Local Authority Accounting in the United Kingdom introduced the requirement for local authorities to report their service segments based on the way in which they operate and manage services, thereby allowing the reporting on the face of the Comprehensive Income and Expenditure Statement to align with how a local authority reports its performance internally to its management.

Corporate overhead allocations are made at the year-end and shared between users in proportion to the benefits received. However, during the year the authority reports to budget holders and members the financial performance without the impact of the corporate recharges. In deference to the intentions of CIPFA's review, the accounts have been reported without support cost recharges, showing support and overhead costs within their respective portfolio lines.

Fair Value Measurement

The council measures some of its non-financial assets such as surplus assets and investment properties at fair value at each reporting date. The Council also discloses fair values for financial assets and liabilities categorised as loans and receivables. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the year end. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability

The council measures the fair value of an asset or liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring the fair value of a non-financial asset, the council takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The council uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Inputs to the valuation techniques in respect of assets and liabilities for which fair value is measured or disclosed in the council's financial statements are categorised within the fair value hierarchy, as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities that the council can access at the measurement date
- Level 2 – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 – unobservable inputs for the asset or liability.

Property Plant and Equipment

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as Property, Plant and Equipment.

Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e., repairs and maintenance) is charged as an expense when it is incurred.

The de minimis level for accounting for expenditure as capital is £5,000.

Measurement

Assets are initially measured at cost, comprising:

- the purchase price
- any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management
- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

The Council does not capitalise borrowing costs incurred whilst assets are under construction.

The cost of assets acquired other than by purchase is deemed to be its fair value, unless the acquisition does not have commercial substance (i.e. it will not lead to a variation in the cash flows of the Council). In the latter case, where an asset is acquired via an exchange, the cost of the acquisition is the carrying amount of the asset given up by the Council.

Assets are then carried in the Balance Sheet using the following measurement bases:

- infrastructure, community assets and assets under construction – depreciated historical cost

- dwellings – fair value, determined using the basis of existing use value for social housing (EUV-SH)
- all other assets – fair value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV)

Where there is no market-based evidence of fair value because of the specialist nature of an asset, depreciated replacement cost (DRC) is used as an estimate of fair value.

Where non-property assets that have short useful lives or low values (or both), depreciated historical cost basis is used as a proxy for fair value.

Assets included in the Balance Sheet at fair value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their fair value at the year-end, but as a minimum every five years. Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains. Gains are credited to the Comprehensive Income and Expenditure Statement where they arise from the reversal of a loss previously charged to a service.

Where decreases in value are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

Componentisation

The 2022/23 CIPFA Code of Practice on Local Authority Accounting states that each part of an item of Property, Plant and Equipment (PP&E) with a cost that is significant in relation to the total cost of the item shall be depreciated separately, applied from 1 April 2010 onwards. Where there is more than one significant part of the same asset which has the same useful life and depreciation method, such parts may be grouped in determining the depreciation charge. In adopting the Code, the Authority has developed the following Componentisation Policy using the approach set out in LAAP bulletin 86:

- Assets within PP&E, excluding Council dwellings with a carrying value of £1m and below, will be disregarded for componentisation as the impact upon the reported cost of service is not considered material.
- Assets, excluding Council dwellings that are above the £1m de-minimis threshold will be componentised where the cost of the component:
 - i) Is significant in relation to the overall total cost of the asset and
 - ii) Has a different useful life and/or method of depreciation to the main asset.

This policy excludes land assets which are already identified separately.

Council dwellings are not individually componentised. The valuation of dwellings is based on a beacon approach using the assumption that the beacon property is fully upgraded. Each property in that beacon has a reduction in value, as a percentage, for each component that is not upgraded.

Impairment

Assets are assessed at each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains)
- where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land and certain Community Assets) and assets that are not yet available for use (i.e., assets under construction).

Depreciation is calculated on the following bases:

- Dwellings – from 1st April 2012 depreciation is calculated based on the useful life of the individual components of the dwelling (30-60 years) depending on the beacon group
- Other buildings – straight-line allocation over the useful life of the property as estimated by the valuer (30-100 years)
- Vehicles – a percentage of the value of each class of assets in the Balance Sheet, as advised by a suitably qualified officer (25% carrying amount)
- Infrastructure – straight-line allocation of between 25-40 years.
- Plant, furniture & equipment – straight line allocation over the useful life of asset (3-25 years)

Where an item of Property, Plant and Equipment assets has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately.

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Disposals & Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale.

The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit on Provision of Services.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as

held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

When an asset is disposed of or decommissioned, the carrying amount of the asset in the Balance Sheet (whether Property, Plant and Equipment or Assets Held for Sale) is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal.

Receipts from disposals (if any) are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for a disposal in excess of £10,000 are categorised as capital receipts. A proportion of receipts relating to Housing Revenue Account disposals (75% for dwellings, 50% for land and other assets, net of statutory deductions and allowances) is payable to the Government. The balance of receipts is required to be credited to the Capital Receipts Reserve; this residual amount can only be used for new capital investment or set aside to reduce the Council's underlying need to borrow (the capital financing requirement). Receipts are appropriated to the Reserve from the General Fund Balance in the Movement in Reserves Statement.

The written-off value of disposals is not a charge against Council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

Provisions, Contingent Liabilities and Contingent Assets

Provisions

Provisions are made where an event has taken place that gives the Council a legal or constructive obligation that probably requires settlement by a transfer of economic benefits or service potential, and a reliable estimate can be made of the amount of the obligation. For instance, the Council may be involved in a court case that could eventually result in the making of a settlement or the payment of compensation.

Provisions are charged as an expense to the appropriate service line in the CI&ES in the year that the Council becomes aware of the obligation. Subsequently, they are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year - where it becomes less than probable that a transfer of economic benefits will now be required (or a lower settlement than anticipated is made), the provision is reversed and credited back to the relevant service.

Where some or all of the payment required to settle a provision is expected to be recovered from another party (e.g. from an insurance claim), this is only recognised as income for the relevant service if it is virtually certain that reimbursement will be received if the Council settles the obligation.

Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably. Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

Contingent Assets

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

Reserves

The Council maintains two groups of reserves, usable and unusable.

Usable reserves comprise the following:

- **Capital Receipts Reserve:** proceeds from the sales of non-current assets are initially credited to the CI&ES, but legally can only be used to finance capital expenditure, and so are transferred to the Capital Receipts Reserve and afterwards used for this specific purpose.
- **Capital Grants Unapplied:** the Council receives grants and contributions towards capital expenditure, and, where repayment conditions are not present or no longer apply, they are credited to the CI&ES and immediately transferred into the Capital Grants Unapplied Reserve until required to finance capital investment.
- **Earmarked Reserves:** the Council may set aside earmarked reserves to cover specific projects or contingencies. These are transferred from the General Fund, and amounts are withdrawn as required to finance such expenditure. The expenditure itself is charged to the appropriate line in the Comprehensive Income and Expenditure Statement. There are no legal restrictions on the use of earmarked reserves, and unspent balances can be taken back to the General Fund in the same way.
- **General Fund:** this represents all other usable reserves for the general fund, without legal restrictions on spending, which arise from annual surpluses or deficits.
- **Housing Revenue Account (HRA):** This is a statutory reserve for the HRA.
- **HRA Earmarked Reserves:** this represents reserves from the HRA which arise from annual surpluses or deficits.
- **Major Repairs Reserve:** This is a statutory reserve which can only be used to fund new capital investment in HRA assets or the financing of historical capital expenditure by the HRA

Unusable Reserves consist of those which cannot be used to finance capital or revenue expenditure:

- **Revaluation Reserve:** this consists of accumulated gains on individual items of Property, Plant and Equipment. The Reserve contains only gains accumulated since 1 April 2007, the date that the Reserve was created. Accumulated gains before that date were consolidated into the balance on the Capital Adjustment Account. The balance is reduced when assets with accumulated gains are:
 - revalued downwards or impaired and the gains are lost
 - used in the provision of services and the gains are consumed through depreciation, or
 - disposed of and the gains are realised.
- **Capital Adjustment Account:** Receives credits when capital is financed from the General Fund or from the Capital Receipts and Capital Grants Unapplied reserves, and receives debits to offset depreciation and other charges relating to capital which are not chargeable against the General Fund. The account contains revaluation gains accumulated on non-current assets before 1 April 2007, the date on which the Revaluation Reserve was created to hold such gains.

- **Deferred Capital Receipts:** in some cases (particularly former housing stock disposed of, where the purchaser financed the transaction through a mortgage from the Council) an asset is disposed of, but the income cannot be collected immediately. The Council maintains records for a long term debtor, offset by a balance in the Deferred Capital Receipts Account. When the income is received the debtor is written down and a transfer is made between this account and the Capital Receipts Reserve.
- **Pensions Reserve:** The Pensions Reserve absorbs the timing differences arising from the different arrangements for accounting for post employment benefits and for funding benefits in accordance with statutory provisions. The Council accounts for post employment benefits in the Comprehensive Income and Expenditure Statement as the benefits are earned by employees accruing years of service, updating the liabilities recognised to reflect inflation, changing assumptions and investment returns on any resources set aside to meet the costs. However, statutory arrangements require benefits earned to be financed as the Council makes employer's contributions to pension funds or eventually pays any pensions for which it is directly responsible. The debit balance on the Pensions Reserve therefore shows a substantial shortfall in the benefits earned by past and current employees and the resources the Council has set aside to meet them. The statutory arrangements will ensure that funding will have been set aside by the time the benefits come to be paid.
- **Collection Fund Adjustment Account:** this represents the differences arising from the recognition of Council Tax income and Non-Domestic Rates in the Comprehensive Income and Expenditure Statement as they fall due from payers, compared with the statutory arrangements for paying across amounts from the Collection Fund to the General Fund.
- **Accumulated Absences Reserve:** this contains the difference between the statutory and accounting liability for the cost of accumulated absences: the cost is properly chargeable to the Comprehensive Income and Expenditure Statement, but not to the General Fund.
- **Financial Instruments adjustment account:** this absorbs the timing differences arising from the different arrangements for accounting for income and expenses relating to certain financial instruments and for bearing losses or benefiting from gains per statutory provisions.
- **Financial Instrument Revaluation Reserve:** this contains the gains made by the Council arising from increases in the value of its investments that have quoted market prices or otherwise do not have fixed or determinable payments. The balance is reduced when investments with accumulated gains are:
 - revalued downwards or impaired and the gains are lost.
 - disposed of and the gains are realised.

Revenue Expenditure Funded from Capital under Statute (REFCUS)

Expenditure incurred during the year that may be capitalised under statutory provisions but that does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement in Reserves Statement from the General Fund Balance to the Capital Adjustment Account then reverses out the amounts charged so that there is no impact on the level of Council tax.

VAT

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. VAT receivable is excluded from income.

The Collection Fund

The Collection Fund shows the transactions of the billing authority in relation to the collection from taxpayers and the distribution to local authorities and the Government of council tax and non-domestic rates. The Council, as a billing authority, is statutorily required to maintain a separate agency Collection Fund account, into which all transactions relating to collection of business rate and council tax income from taxpayers and distribution to local government bodies and central government are made. The Collection Fund account is accounted for separately from the General Fund.

The Council collects income from payers of Council Tax and Non-Domestic Ratepayers, but only part of the income relates to this Council, the balance being collected on behalf of other major precepting authorities, including the Government. The amounts of debtors, adjustments for doubtful debts, overpayment creditors and receipts in advance that relate to the precepting authorities are shown as a single net debtor or creditor in the balance sheet. The element of the Collection Fund due to preceptors is held as part of the Short Term Creditors balance. Annual changes in the amounts held for preceptors are shown as part of financing activities in the Cash Flow Statement.

The amounts legally credited to the General Fund are those estimated before the start of the financial year, including distributions of estimated surplus, or contributions towards estimated deficits. In accounting terms, however, the Council's share of the collectable debit (including adjustments to allowances for doubtful debts and appeals) are credited to the Comprehensive Income and Expenditure Statement. The difference between the cumulative amounts for statutory and accounting purposes forms the Collection Fund Adjustment Account (an unusable reserve) and the annual adjustment forms part of the accounting and financing adjustments.

The cash flow statement only includes in revenue activities cash flows relating to its own share of council tax and business rates income collected. The difference between the government and the preceptors' share of the net cash collected and the net cash paid to them is included as a net movement in other liquid resources.

There are a number of Business Rates reliefs available to rate payers which are mandatory, the government funds these reliefs in full (except for Small Business Rate relief which it funds in part) via s31 grant to each authority. The s31 grant included in the CIES for the year that which is equal to the NNDR3 outturn. Any excess of this amount compared to the estimated NNDR1 figure is transferred to a s31 earmarked reserve and distributed in subsequent years against any deficit amounts.

Under the Business Rate Retention Scheme the government has calculated the Funding Baseline which each authority needs to fund its business as well as a Business Rate Baseline which relates to the collectable NNDR, the difference between the two will either result in an individual authority paying a tariff to, or receiving top-up from the government. In a two tier authority the County Council will be in a top-up position and the billing authority in a tariff position. The tariff or top-up is reflected in the authority's individual CIES i.e. does not go through the Collection Fund.

The authority is required to calculate whether it is in a levy or safety net position at year end. If the authority's income from NNDR and the s31 grant less the tariff paid is greater than the funding baseline then a levy is payable according to the levy formula, the percentage of levy is capped at 50%. If the authority's income from NNDR and the s31 grant less the tariff paid is less than 92.5% of the funding baseline then the authority is entitled to a safety net payment. Any levy/ safety net amounts are accrued and included in the CIES and in creditors/debtors as appropriate in the Balance Sheet.
