Report

Background

1. Roadworks are a source of frustration and inconvenience to road users but they are an essential operation and need to be managed carefully to minimise their impact on the travelling public.
2. There are 2 main originators of roadworks; The Highway Authority and public utility companies. Norfolk County Council has a responsibility to improve and maintain the highway, while the public utility companies have a responsibility to provide and maintain their infrastructure, the vast majority of which is located under the highway. From time to time developers are also required to work in the highway, carrying out improvements to facilitate access to their developments.
3. The table attached as appendix 1 sets out the current works that are have been completed since your last meeting, are currently in progress or are planned for the future on the A, B and C class roads within the city. More detailed roadworks information is provided online via the electronic local government information network at <http://norfolk.elgin.gov.uk>
4. The more significant works are highlighted below.

Christmas embargo

5. Every year the highway authority and utility companies are banned from undertaking any planned works on the main road network, or on the majority of streets within the inner ring road, between Remembrance Sunday and the second week of January, the main Christmas shopping / sales period. The exception to this are emergency works that cannot be delayed, and works that have no affect on the free flow of vehicles or pedestrians.

Works completed since last report

Location	Lead Authority	Type of scheme	Traffic management	Expected completion	Remarks
