7/08/09

Dear Sir,

Re: Hackney Carriage Licensing

I am writing now to formally apply to replace my current taxi vehicle, registration number BU 04 XRD, license plate no. 514, with a Peugeot E7.

I am aware, from our earlier correspondence, that the E7 does not comply in every respect with the City Council's current taxi vehicle specification (although it does incorporate all essential taxi attributes and exceeds the current vehicles' features in some important safety and environmental respects) and I therefore request the Licensing Committee to amend, or make an exception to, the current specification, and agree to my request to license a modern alternative vehicle which offers superior features for the benefit of operators and passengers.

Allied Vehicles, the manufacturers of the E7 taxi, are of course aware of my wish to purchase one of their vehicles, and have agreed to provide any technical information which you may require. I understand that Mr. Parris Allied Vehicles' national operations manager intends to contact you separately in this regard.

I shall appreciate your early advice as to how this matter will be taken forward.

Yours faithfully,

P. Keenaghan

Mr. Ian Streeter,
Licensing Manager,
Regulatory and Democratic Services,
Norwich City Council,
City Hall,
St Peters' St.,
Norwich,
NR2 1NH.

7 August 2009

Dear Sir,

Re: Allied Vehicles Peugeot E7 Taxicab.

We are applying to license the E7 as a hackney carriage in Norwich and, in connection with that application, request that Norwich's licensing policy be amended to enable this model of taxi to be licensed.

The Peugeot E7 is a fully featured wheelchair accessible taxi of modern design and engineering. It incorporates all necessary taxi features and offers safety and environmental benefits which are not currently available on vehicles which comply with Norwich's present taxi specification.

The E7 is purpose built by Allied Vehicles, in association with Peugeot, and the final assembly is completed at our manufacturing facility in Glasgow. The completed vehicle carries full European Community Whole Vehicle Type Approval which is the "Gold Standard" in certification of motor vehicle safety and environmental performance.

We are pleased to enclose an E7 brochure and a copy of our certificate of "Whole Vehicle Type Approval".

We are aware that the E7 does not comply with Norwich's current taxi specification, the current specification and policy have been in place, substantially unchanged, for a considerable number of years.

At the time of adoption of the current policy wheelchair accessible alternative taxis like the E7 did not exist.

The E7 has now been developed to offer superior access, comfort and ride quality to all (but in particular mobility impaired) passengers.

Certificate No. FS 36382

ALLIED VEHICLES LTD 230 BALMORE ROAD GLASGOW G22 6LJ. TELEPHONE: 0141 336 3211

Sales Fax: 0141 336 7263 Service and Parts Fax: 0141 336 4511 Accident Repair Centre Fax: 0141 336 5686

Registered in Scotland No. 147093, Vat No. 624 1343 73. Registered Office: 230 Balmore Road Glasgow G22 6LJ.

The E7 also offers lower costs, greater fuel efficiency and better environmental performance, for the benefit of operators, passengers and residents of Norwich.

In closing I would request that, when the committee meet to consider this application, I may have the opportunity to address the members to present the E7, and to offer to answer any questions which may arise.

I shall, of course, be pleased to offer any further help or information which you may require, and look forward to hearing from you further as this matter progresses.

Meanwhile, should you wish to contact me by telephone my numbers are;

Communication concerning the EC Type-approval of a type of complete vehicle with regard to
Directive 1970/156/EEC as last amended by Directive 2001/116/EC

EC type-approval number: e11*2001/116*0315*00

Reason for Extension: Not applicable

0.1. Make (trade name of manufacturer): Allied Vehicles Ltd.

0.2. Type: G9

0.2.1 Commercial name(s) ⁽²⁾: E7

0.3. Means of identification of type, if marked on the vehicle: Not applicable

0.3.1. Location of that marking: Not applicable

0.4. Category of vehicle ⁽³⁾: M1

0.5. Name and address of manufacturer of the complete vehicle ⁽¹⁾:

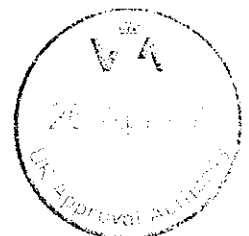

Allied Vehicles Ltd.
230 Balmore Road
Glasgow
G22 6LJ
United Kingdom

Name and address of manufacturer of the base vehicle ^{(1) (4)}:

Automobiles Peugeot
75 Avenue de la Grande Armee
75116 Paris
France

Name and address of manufacturer of the latest built stage of the incomplete vehicle ^{(1) (4)}: As
above

Name and address of manufacturer of the completed vehicle ^{(1) (4)}: As above

0.8. Name(s) and address(es) of assembly plant(s):

Allied Vehicles Ltd.
230 Balmore Road
Glasgow
G22 6LJ
United Kingdom

The undersigned hereby certifies the accuracy of the manufacturer's description in the attached information document of the vehicle(s) described above ((a) sample(s) having been selected by the EC type-approval authority and submitted by the manufacturer as prototype(s) of the vehicle type) and that the attached test results are applicable to the vehicle type.

1. For complete and completed vehicles/variants ⁽¹⁾:

The vehicle type meets ⁽¹⁾ the technical requirements of all the relevant separate Directives as prescribed in Annex IV and Annex XI ⁽¹⁾⁽⁴⁾ to Directive 1970/156/EEC.

2. For incomplete vehicles/variants ⁽¹⁾: Not applicable

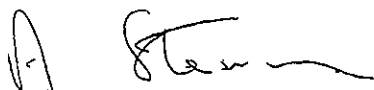

The vehicle type meets/does not meet ⁽¹⁾ the technical requirements of the separate Directives listed in the table on side 2.

3. The approval is granted ⁽¹⁾

4. The approval is granted in accordance with Article 8(2)(c) and the validity of the approval is thus limited to dd/mm/yy. Not applicable

The Next Generation

The purpose-built E7 has already revolutionised the UK's hackney taxi market. Now Cab Direct and Peugeot bring you a new generation, purpose-built for the professional taxi driver with even more ground-breaking features.

For more information or to arrange your free, no-obligation test drive freephone 0800 916 3061, email info@cabdirect.com or visit www.cabdirect.com. We look forward to meeting you.

Designed and manufactured jointly by Peugeot and Cab Direct, reliability and performance are hallmarks of the E7's success in the hard-working UK hackney taxi fleet. The secret of that success lies in a vehicle that is genuinely purpose-built, combining a class-leading engine, drive train and vehicle body, all designed to work in perfect harmony.

Purpose Built Taxi

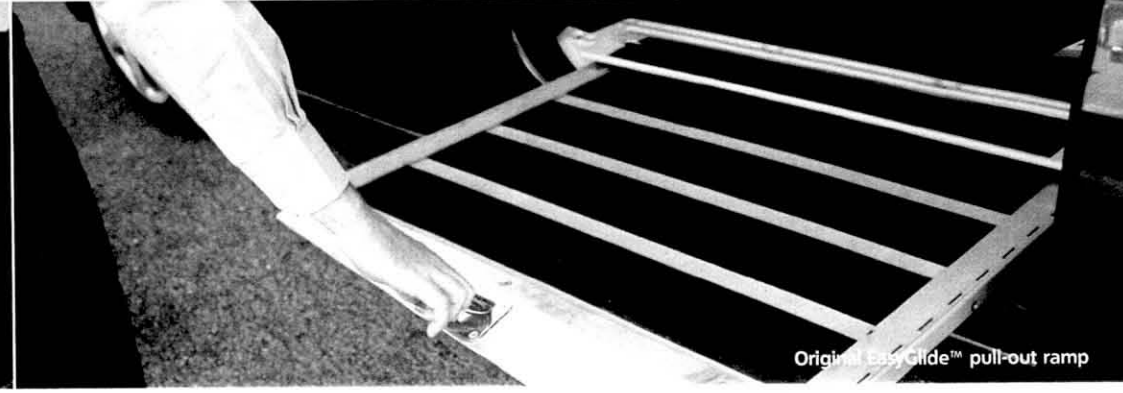

Think Smart, Think **E7**

Six-seat passenger compartment

Protective bumpers with integral fog lamps

Original EasyGlide™ pull-out ramp

Development

A £473 million development programme has created the ideal combination of engine, clutch and gearbox, designed and tested in tandem with the E7's high-strength monocoque vehicle body. Modern design excellence is carried through to the superb driving position, high impact partition screen and comfortable rear passenger compartment to complete the ideal hackney taxi.

Side rubbing strips and large, multi-section bumpers provide vital protection against minor bumps and scrapes. And unlike many other taxis, the E7 comes to you with the reassurance of the highest possible standard of safety testing – European Whole Vehicle Type Approval (Type Approval number e11*2001/116*0315).

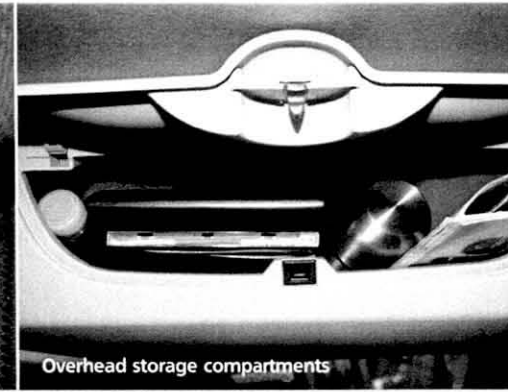

Drive in Style

Dash-mounted intercom

Centre console storage bin

Overhead storage compartments

When your vehicle is your workplace, comfort and convenience are certain to be high on your list of requirements. Which is exactly why New E7 offers a new dimension in driver benefits.

Comfort Cab

Inspired vehicle design has created even greater driver comfort. The carefully sculpted driver's seat comes with active, pump-action height and tilt adjustment which, combined with steering column adjustment, allow you to create your optimum driving position. New E7's top-specification driver's seat even provides optional lumbar support – perfect for anyone who spends long hours behind the wheel. In addition the low, one-step well is also ideal for anyone who gets in and out of the cab several times a day.

Electric one-touch windows, multi-function heater and air conditioning – all as standard features – mean you're sure to find the right working temperature, whatever the weather. The in-built CD/radio comes with remote controls, handily located on the steering column. You can even choose to play front and rear speakers or switch to front only, so you can enjoy your favourite music while your passengers chat amongst themselves.

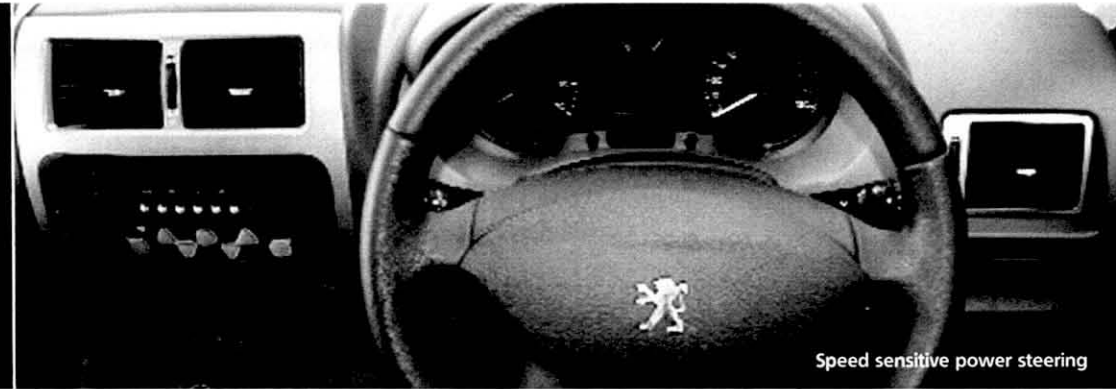

Storage Space

You'll also find numerous storage areas for the daily essentials of the working taxi driver. In addition to overhead lockers, door cubbies and under-seat pockets the centre console storage bin is sure to come in handy, as will the dashboard mounted retractable cup holders.

Driveability

Think Smart, Think **E7**

Quite simply New E7 drives like a dream. Numerous independent road tests have highlighted the vehicle's superb all-round vision, manoeuvrability and handling.

The raised driver position plus large area windscreen and side windows create exceptional visibility, especially useful in busy traffic. Similarly the large area tailgate window provides enhanced rear visibility which, together with superb full-size wide angle door mirrors, will make your life as easy as possible. Add to this Peugeot's latest electro hydraulic speed-sensitive power-steering, an ultra-smooth six-speed gearbox and the legendary responsiveness of the HDi engine and you have a nimble and manoeuvrable cab that's ideal for the busiest traffic conditions.

Passenger Comfort

The E7's spacious passenger compartment promises your customers a relaxing journey, every fare.

Excellent road-holding and modern suspension guarantee passengers a flat and comfortable ride. Inside, comfortable facing seating accommodates six passengers in the rear compartment. Finished to the highest quality using proven, hard-wearing material, the passenger area also benefits from separately controlled heating. Similarly the dash-mounted EasyTalk™ two-way intercom – uniquely designed for the E7 with variable audio control – makes communication easy. Business passengers can even plug in their laptop as they enjoy the journey.

Bags of Space

Whether it's hotels, train stations or airport runs, today's passengers often come with plenty of luggage. Which is why New E7 brings you an amazing 70% more luggage space. Even better, the celebrated EasySlide™ rear seat enables you to create even more space for loading cases out of harm's way. You can also choose an additional luggage pen up front, beside the driver. And now, for the first time, you have the option of the E7 *plus*, with even greater luggage room – ideal for regular airport fares.

Safety Zone

Sadly, protection from violence against taxi drivers is becoming ever more important. The steel reinforced partition features a high-impact protection screen tested to European standards. The driver can also choose added security by locking both front doors while the rear doors remain open for passengers.

Peugeot HDi

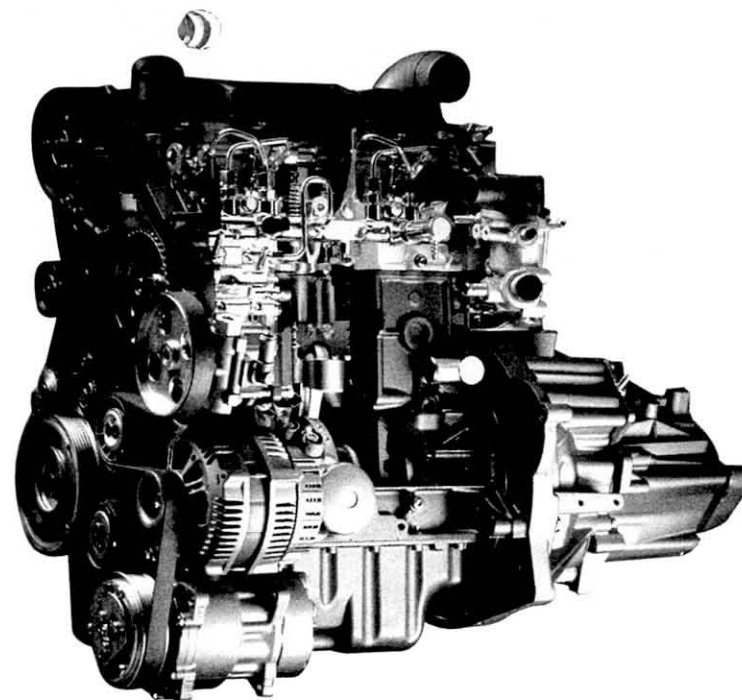

Pioneers in diesel engines since 1928, Peugeot continues to lead the world in diesel technology.

The E7 hackney taxi is powered by the latest generation of Peugeot HDi engines. Amazingly, the all-new E7 power plant is even smoother than its illustrious predecessor and offers a class-leading blend of performance and economy.

Pulling Power

Power is one thing, smooth performance another. The E7's 2.0 litre HDi engine manages to deliver both at once, for maximum driveability and responsiveness.

Returning a plentiful 120 brake horsepower is just part of the story. As any taxi driver knows, low-end torque is crucial and the E7's HDi engine delivers a magnificent 70% of its punchy torque output at just 1,250 rpm. Touch the accelerator and the HDi engine responds instantly and eagerly. Take your foot off the pedal and the E7 decelerates with perfect poise. All-round smoothness that's a joy for both driver and passengers.

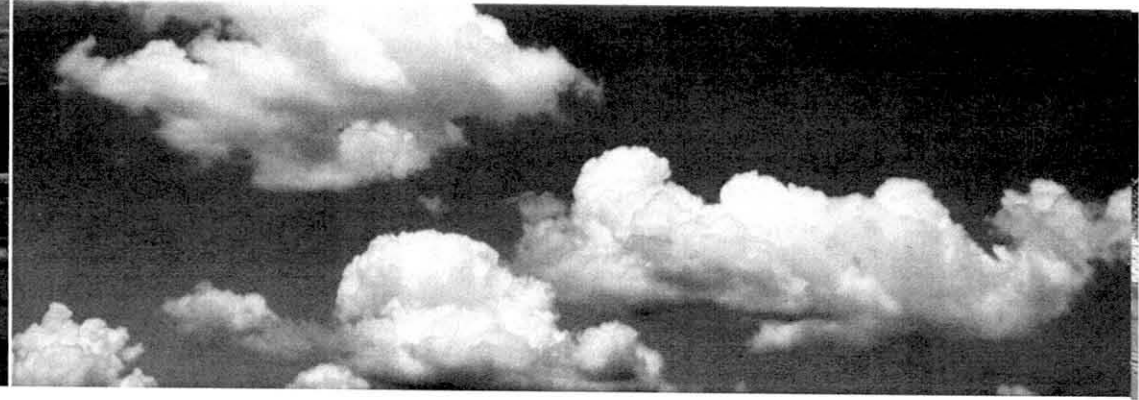

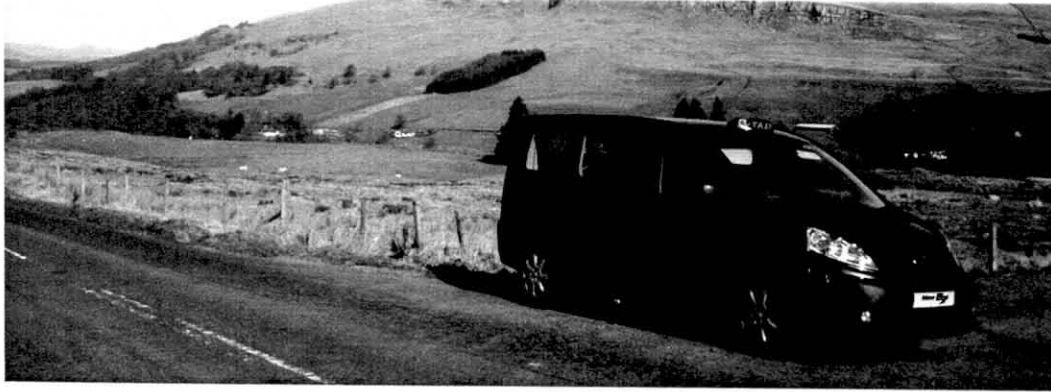

Money Saver

Peugeot diesel technology will also save you money. In fact, the latest generation of HDi engines is a staggering 20% more efficient. This means that with HDi you can work longer – and earn more – on one tank of fuel than you can with other purpose built taxis.

Now that really matters.

Lean & Green

Think Smart, Think **E7**

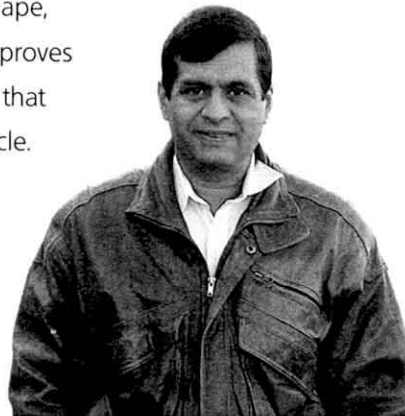

The E7's Peugeot HDi engine is quite simply one of the most fuel efficient and environmentally friendly power-plants on the market.

Economy

Because Peugeot's direct injection system delivers fuel with incredible precision, HDi engines carefully regulate use of fuel, cutting the overall amount you need and making them more economical than other diesel engines. On top of this, New E7's modern aerodynamic shape, including the stylish low-profile taxi sign and rear spoiler, also improves fuel consumption through reduced wind resistance. So much so that New E7 delivers an impressive 38 mpg on the combined test cycle.

Environment

The E7's all-new HDi engine comfortably exceeds the Euro 4 emissions standard, which means it substantially reduces sooty carbon particulates that can pollute towns and cities. Harmful CO² emissions are also significantly lower than other hackney taxis. The HDi engine can even operate on up to 30% bio diesel.

"I'm making huge weekly savings thanks to the E7's excellent fuel economy."

Majeed Ahmad Peugeot E7 Owner

The E7's market-leading HDi engine is complemented by its modern vehicle body and platform.

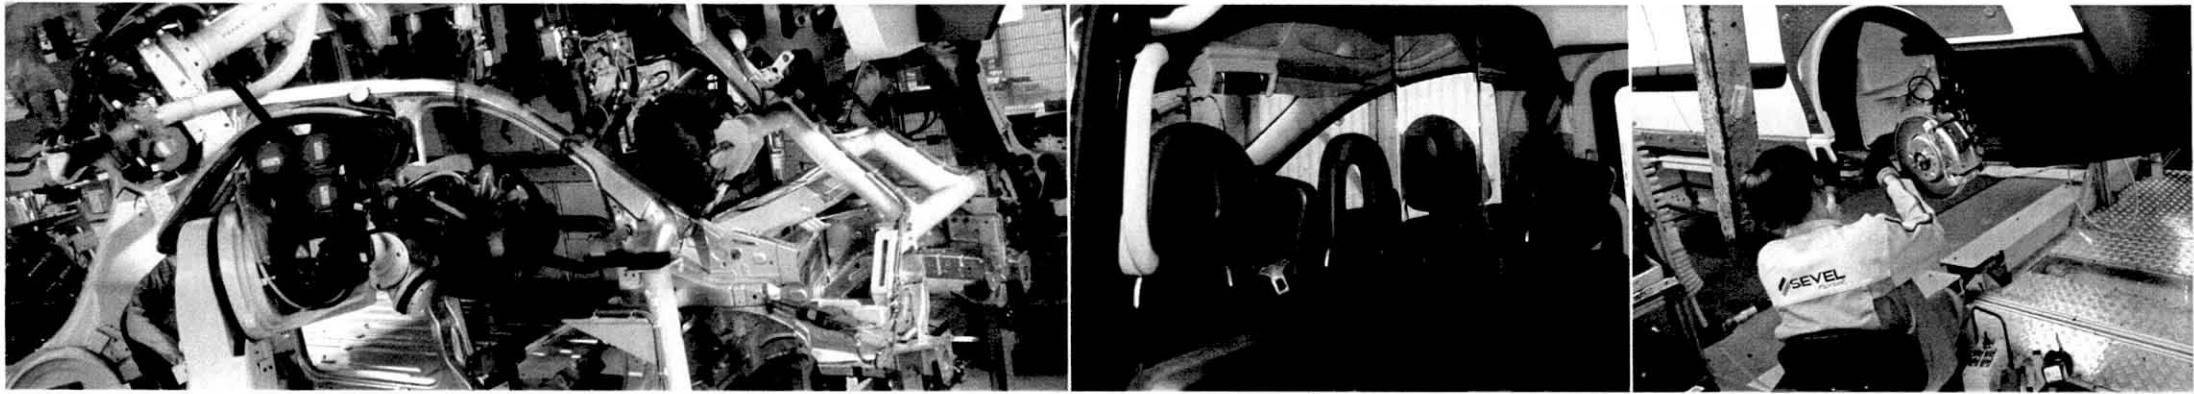

Smooth Roller

Driving thousands of miles every year is guaranteed to make you – and your back – sensitive to every bump of the road. The all-new vehicle platform means that New E7 promises an even more comfortable journey for both you and your passengers.

All-round independent suspension ensures excellent road holding and minimal roll. This is complemented by the strong body shell, boasting the best torsional stiffness in its class. Superior build quality – including improved under body sound insulation – also means that the E7 offers a smoother, quieter ride with reduced vibration and road noise.

Even Smoother, Even Safer

Think Smart, Think **E7**™

Stop Fast

All-round disc brakes, aided by advanced four-channel ABS braking plus Emergency Brake Assist, ensure impressive stopping ability helping keep you on the right track when lesser vehicles would be skidding out of control.

Safety Shell

Safety for you and your passengers is paramount. The E7's monocoque vehicle body provides a supremely strong shell to manage everyday driving stresses as effectively as it copes with the drama of an accident. In-built crumple zones are designed to absorb energy in the event of an impact, making it safer for both driver and passengers than a traditional, chassis-built vehicle. Add pre-tensioning 3-point

seatbelts, front and rear head restraints along with front and side airbags for the driver and it's easy to see why the E7 is a leader in the field of safety.

Autolock™ indicators also enable you to prevent your passengers exiting into traffic from the wrong side of the vehicle.

Access for All

Secure forward-facing wheelchair option

Taxis provide a vital component of the UK's public transport network. Disabled people in particular often depend on taxis to get about, which is why New E7 raises standards in accessibility for disabled passengers. Options include induction loops for the hard of hearing, while all E7s are fully wheelchair accessible.

Easy does It

Manual or cab-operated electric side-steps, together with high-visibility grab handles and floor edging assist passenger entry and exit, while both rear and tip-up seats are ergonomically designed for ease of use. New E7's wider doorway is a bonus for wheelchair users in particular. You also have a choice of wheelchair ramps, depending on the model, including the revolutionary EasyGlide™ pull-out ramp – even lighter, even quicker and even easier to use.

Wheelchair Security

Once inside the vehicle, the larger flat-floor area and improved headroom make manoeuvring the wheelchair into the correct travelling position so much easier than in other hackney cabs. Quick-attach restraints make securing the wheelchair as easy as possible and the wheelchair passenger is also secured by a full lap-and-diagonal seatbelt. Both wheelchair and occupant restraints have been tested to the highest standards ever achieved in a UK taxi. For the first time many wheelchair users can also now have the option to choose a forward-facing position.

Model Choice

Think Smart, Think 

At Cab Direct we believe in choice – and that taxi owners and drivers are best placed to decide on the ideal vehicle for the job you do. That's why we've created three fantastic models for you to choose from.

Why Cab Direct?

There are many good reasons why more people choose Cab Direct –
and choose the E7 - than any other modern taxi manufacturer in the UK.

- Engineering excellence through a unique joint-manufacturing partnership with Peugeot
- Solid company background, trading successfully in the taxi market for 14 years
- Safety-assured with European Whole Vehicle Type Approval
- Free, no-obligation demonstrations throughout the UK
- Free delivery anywhere in the UK
- Peace of mind with five year, unlimited mileage warranty cover
- Service and support from more than 300 local service partners
- Free technical helpline, open seven days a week

Many companies have tried to copy our vehicles but none match the overall quality of product, backup service and value for money represented by the record-breaking E7.

Peace of Mind

When your vehicle is your livelihood, you'll want to know your cab is reliable and you'll want to be sure you're covered should anything major go wrong.

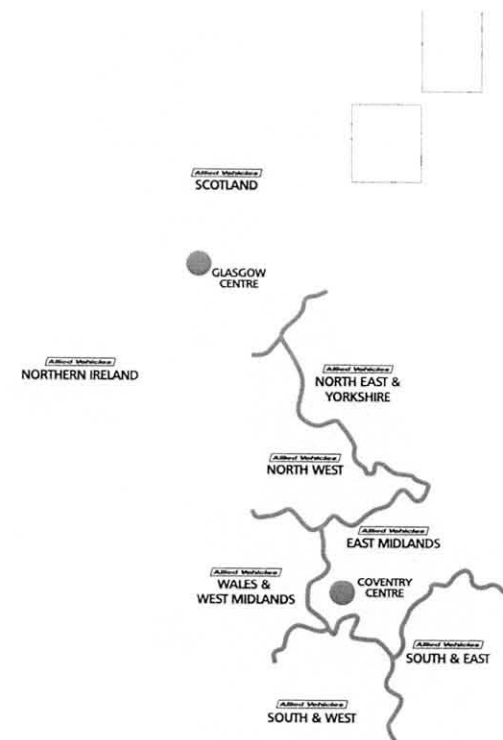

Your Reassurance

Modern build quality combined with the legendary Peugeot HDi engine have given the E7 an enviable reputation for reliability. That's why so much of our business comes from E7 drivers who recommend the vehicle to other drivers. In turn, knowing the vehicle's up to the job gives us the confidence to provide the reassurance of our unique five year, unlimited mileage warranty.

Service and Support

Efficient service and support is vital for everyone in the hard-working taxi industry. First and foremost you'll have access to more than 300 local service partners throughout the UK. There's also the added benefit of our huge stock of E7 parts which can be delivered overnight to you or your garage service provider. We even provide a free technical helpline, open seven days a week, to help you resolve any queries and issues that may arise. You'll also have the benefit of free AA breakdown cover for the first year (three years on E7XS).

Think Smart, Think **E7**

"My E7's done 256,000 miles and I've never had a problem with it."
